Littlewood Farm 2012 Seedling Variety Guide

Plum Regal (F1)	Seedway		Det. Red plum with late blight resistance
San Diego (F1)	FEDCO	64	Det. Uniform, oval fruits with good disease resistance and productivity
Amish Paste	FEDCO	85	Ind. Large meaty "oxheart" heirloom
Orange Banana	FEDCO	85	Ind. Sweet, cylindrical orange fruits

*Variety: (F1) indicates a hybrid seed made from two open-pollinated varieties. Hybrids are often (but not always) more productive and have better disease resistance than open-pollinated varieties but their seed cannot be saved with consistent results.

*Source of seed: JSS - Johnny's Selected Seeds, TSC - Territorial Seed Company, HM - High Mowing, TT - Totally Tomatoes; also Seedway and FEDCO

*Description: For Tomatoes, Det. - Determinate; "Bush" variety does not need pruning, can be trellised or not, fruits ripen with a concentrated period. Ind. - Indeterminate; variety should be pruned as well as trellised or caged, fruit ripens over a period of time.
